

SUGAR BURST

Game Rules

Game Type Video Slot (5x6 Grid)	Ticket Price Variable Bet	Minimum Age 18+
---	-------------------------------------	---------------------------

Information Displayed

The Sugar Burst game screen presents the following information at all times:

- Balance:** Total credits available, updated after every spin
- Win:** Payout from the most recent spin, shown in gold
- Bet:** Current stake per spin (default 1.00)
- Grid:** 6 columns x 5 rows with 30 symbol positions, always visible
- Controls:** All buttons displayed along the bottom edge of the screen

Symbol tiers on the grid:

- **Low tier** Candy skewers and lollipops. Most common, lowest payout
- **Mid tier** Watermelon, apple, banana. Moderate frequency and value
- **High tier** Grapes and purple hearts. Rare, highest payout
- **Special** Dark bomb with orange flower. Acts as Scatter and Wild

Slot Grid Mechanics

- Grid size:** 6 columns x 5 rows = 30 symbol positions per spin
- Win mechanic:** Cluster pays. No traditional paylines are used
- Win threshold:** 8 or more identical symbols connected anywhere on the grid
- Payout formula:** Symbol base value multiplied by the number of matched symbols

Tumble chain

Every time a winning cluster forms, the matched symbols explode off the grid. New symbols drop down from above to fill the empty spaces. The grid is then re-checked. This process repeats until no new winning cluster forms, making it possible to chain several wins from a single spin.

Spin modes

- **Manual** One spin per tap of the Spin button or SPACE key
- **Auto** Continuous spins until the player taps STOP or the balance is too low
- **Turbo** Speeds up drop and tumble animations only. No effect on odds
- **Buy Feature** Instantly enters Free Spins for a cost of 100x the current bet

Winning Rules

Core win condition

8 or more matching symbols must form a connected cluster anywhere on the 6x5 grid. Symbols must be adjacent horizontally or vertically. The win amount equals the symbol tier value multiplied by the cluster size. Larger clusters pay proportionally more.

Win celebration tiers

All tumble wins within a single spin are summed. That total is divided by the bet to produce a spin multiplier. If the multiplier crosses a threshold, a full-screen celebration overlay fires:

Big Win 10x to 24.9x bet *BIG WIN! overlay*

Mega Win 25x to 49.9x bet *MEGA WIN! overlay*

Epic Win 50x and above *EPIC WIN! overlay*

No win outcome

If no cluster of 8 or more matching symbols forms at any point during the spin and tumble chain, no win is credited. The bet amount is deducted from the balance and the next spin can begin

Game Features

Cluster pays

Match 8 or more identical symbols connected anywhere on the 6x5 grid to win. Winning symbols explode and new ones tumble down. The tumble process repeats until no new winning cluster remains.

Scatter

The bomb symbol is the Scatter. Landing 4 or more in a single spin triggers 10 Free Spins and pays a direct coin bonus based on the number that land:

- **4 Scatters** 3x current bet
- **5 Scatters** 5x current bet
- **6 or more Scatters** 100x current bet

Retrigger

If 3 or more Scatter symbols land while Free Spins are already active, 5 extra spins are added. There is no stated cap, so retriggers can stack indefinitely.

Multiplier bombs

A rainbow-icon symbol that appears exclusively during Free Spins. Each bomb carries a random multiplier between 2x and 100x. When multiple bombs are active, all their values are added together first, and that combined total multiplies the payout from each tumble win in the round.

Note: Example: two active bombs at 10x and 20x produce a combined 30x multiplier on every tumble win

Buy bonus

Skips directly into the Free Spins bonus round. Cost is 100x the current bet. At a bet of 1.00, the cost is 100.00 credits. This button is disabled while Free Spins are already active.

Turbo mode

Speeds up the drop and tumble animations only. Turbo mode has no effect on odds, RTP, or any game mechanic. The button glows while active. Tap again to turn it off.

Controls

Previous (Bet): Decrease the current bet. Disabled during Free Spins. Located left of INFO

Info (Paytable): Opens the payable, rules, and game details

Spin (Play): Plays one round. Also activated by pressing SPACE on keyboard

Buy (Bonus): Purchases Free Spins for 100x the current bet. Disabled during Free Spins

Next (Bet): Increase the current bet. Disabled during Free Spins. Located right of BUY

Turbo (Mode): Speeds up animations. Tap again to turn off. Glows when active

Auto (Play): Continuous auto-spin. Tap STOP to cancel. Disabled during Free Spins

Sound: Toggles all game audio on or off

Return to Player

- Theoretical RTP: **95.00%** represents the long-term expected percentage of wagered funds returned to players over a significant number of game rounds. Actual results may vary during individual play sessions.

Volatility

- **Volatility Level: Medium**

Play Responsible

Most importantly, play for fun and always gamble responsibly.
